**Pioneer
Protector® Traits**

Lumiderm™

INSECTICIDE SEED TREATMENT

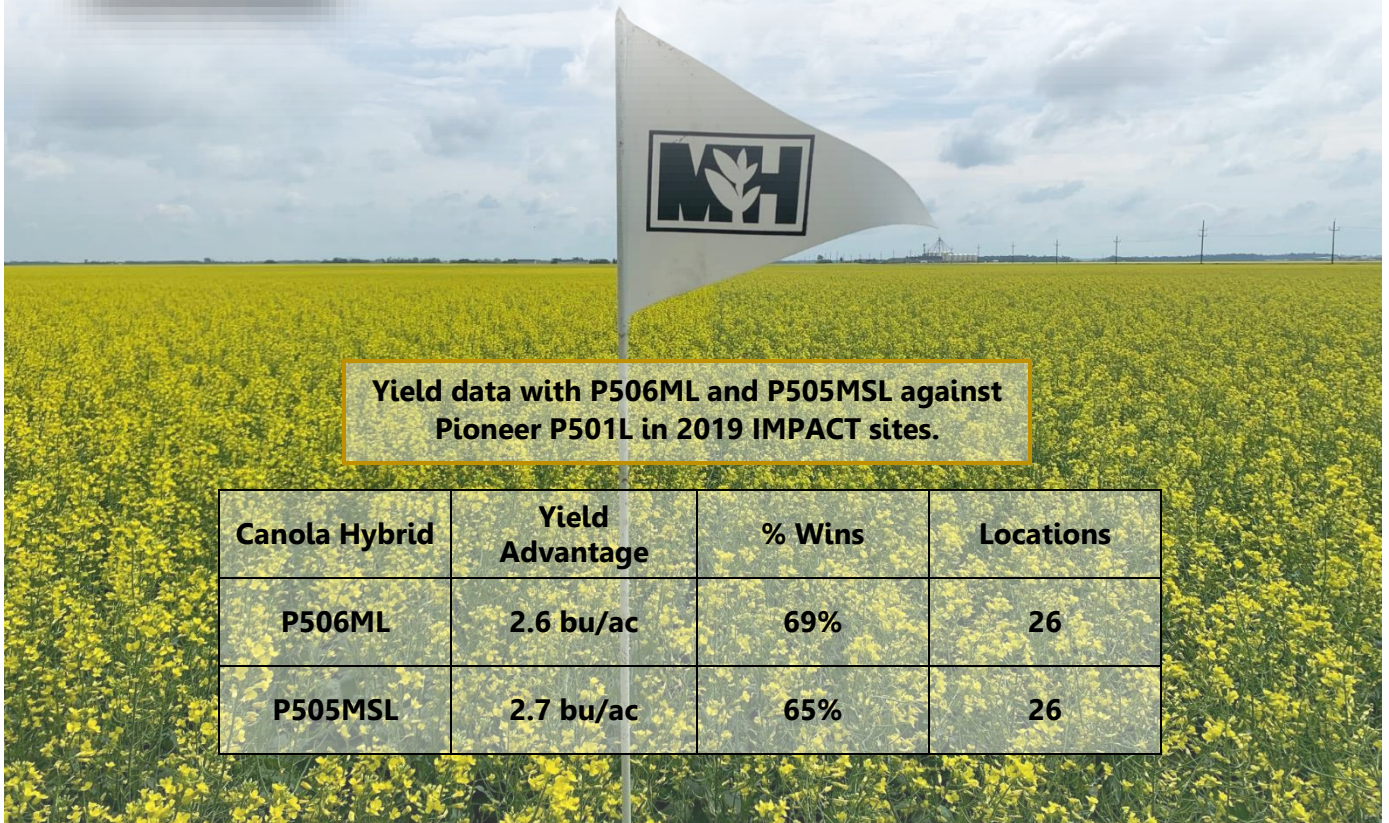

Our reseed policy is 75% off of the original price. Just in case.

P506ML, P505MSL, and P508MCL are mid-maturity canola hybrids, comparable to L345PC.

All Pioneer canola is treated with Lumiderm and Helix Vibrance insecticides. These premium treatments are the best choice for flea beetle and cutworm control.

Expect performance and service with our TKW (thousand kernel weight) guarantee. Need more seeds per acre? No problem. We even have an app for that: Pioneer Canola Seed Rate Calculator.

Yield data with P506ML and P505MSL against Pioneer P501L in 2019 IMPACT sites.

Canola Hybrid	Yield Advantage	% Wins	Locations
P506ML	2.6 bu/ac	69%	26
P505MSL	2.7 bu/ac	65%	26
