

# PIONEER® App Instructions

1. Go to the App Store on your Iphone or Ipad.
2. Search “Pioneer Seeds” in the apps and download for free.
3. Open the app on your device and select Sign In/Sign Up.
4. Select “Sign Up Now”.
5. Enter your email address and select “Send verification code”.
6. Capture the code from your email and return to Pioneer App screen.
7. Enter code from email and proceed to create your password.
8. Enter your first name, last name, and postal code.
9. Select “agree” to the Pioneer privacy terms.
10. Select your operation and “Next” in the top right corner.
11. Select 2021 as your crop year.
12. Now you are in the Pioneer App. The 3 tabs on the bottom are the features.
13. The first tab is “My Fields” and this feature is still being built. It is not currently available. The second tab is “Yield Estimation” which guides you through an accurate estimate.
14. **The third tab is “Product Tools” and this will show the best planter settings for excellent singulation. It also has a Rate Estimator that can help you decide on the seeding rate for select hybrids. Scan the barcode on your seed tag or enter the batch number manually. Then, select your planter model and the app will generate settings based on different discs or finger planters.**

If you require assistance, please do not hesitate to call Karis at 204-392-2446.

Thank you.
