

**MARC HUTLET**  
**SEEDS LTD.**

**The Proving Ground**  
**2013 TRIAL RESULTS**

## A MESSAGE FROM MARC HUTLET SEEDS LTD.

Our team is proud to release the 2013 Proving Ground weigh wagon results for grain corn, silage corn, soybeans, canola and sunflowers from our area. The 2013 crop year can only be described as 'one to remember' as record yields were harvested on numerous fields in many different crop types.

The evidence of this is a record-smashing 30 Yield Challenge winners in grain corn in 2013. For the first time ever; three strips were recorded at over 200 dry bushels per acre! There were also 13 soybean Yield Challenge winners along with one canola Yield Challenge winner as 46H75 establishes itself as a leader hybrid. All these producers will be rewarded for their achievement with 20 acres of free seed in 2014.

This yearly booklet is only possible because of all the cooperators who take the time during our frenzied planting season to plant these trials. These trials in turn produce real-world field scale results which help our team aid producers in making the best decisions when selecting hybrids and increasing yields. THANK YOU ONCE AGAIN TO ALL OUR TRIAL PARTICIPANTS.

Pioneer Hi-Bred Ltd. will launch an array of new products in 2014 including 4 new soybean varieties; 63ME80 sunflowers; 55V50 alfalfa; P7632AM, P7632HR, P7632R, P8210R, P8673AM and P8906AM **corn hybrids** and a revolutionary new alfalfa silage **inoculant, IIAFT**.

In order to better serve our customers, our facility has undergone a major renovation and addition. Marc Hutlet Seeds Ltd. is building a new office (as illustrated on right) as well as increased warehousing that will be complete by year's end. These improvements will create room for a full-time office position which will be finalized soon.

The first pay period was a tremendous success indicating a strong signal that our team, genetics and programs are helping our current customers as well as many new ones grow more bushels. Don't miss out on your last opportunity to lock in your input costs for the year! **Buy now and get the same price until seeding is over!** No other company offers such a rewarding program. For those of you who booked a month ago and have acres to add - this is a great time to secure your supply as the top corn hybrid supplies grow tighter.

Our team is ready to be your trusted advisor and local experts. Local producer grown and managed trials provide the information you need to get the right product for the right acre.

Thank you for your continued support.

*Marc Hutlet*

## Feature products:

Our experts are grown locally

### 900Y61

**2425 heat units**

- Very early variety
- Outstanding field emergence
- Excellent harvest standability

### 900Y71

**2450 heat units**

- Very early variety
- Solid agronomics
- Built-in Phytophthora resistance (Rps1c)

## New Soybean Products

### P001T34R

**2350 heat units**

- Ultra Early maturity, earlier than 900Y61
- Very good early growth and harvest standability
- Average canopy width
- Very strong iron chlorosis

### P002T04R

**2350 heat units**

- Ultra early maturity, earlier than 900Y61
- Excellent early growth scores and harvest standability
- Above average canopy width
- Built-in Phytophthora resistance (Phytophthora gene 1k)
- Good iron chlorosis

### P008T22R2

### P008T70R

**Very limited introductory supply for 2014**

 **PIONEER.**

**P001T34<sup>R</sup>**

## Soybean Numbering System

### Example: P001T34R

- P** Denotes a Pioneer® brand product
- 001** Relative Maturity Group
- T** Denotes "T - Series"
- 34** Random Number (0-99)
- R** Segment Identifier –  
R = Roundup Ready® gene
